In the United States, 91.7% of households own at least one car, with this trend upwardly rising, as of 2023 the U.S had over **231 million registered cars.**

Transportation Pathway Cards

GLOBAL ISSUES

Transportation accounts for **20%** of the world's energy and 2/3rds of the oil used worldwide which produces **16%** of the world's Greenhouse gas emissions.

Transportation Pathway Cards

SHELTER/ENERGY

focuses creating on sustainable housing using: less and renewable power, efficient designs and eco-friendly materials to reduce emissions and improve living conditions.

Shelter/Energy Pathway Cards

LOCAL ISSUES

Many low-income households in Philadelphia face high energy burdens, with energy costs consuming **10.5%** of their income, versus **2.7%** for all other homes.

Shelter/Energy Pathway Cards

NATIONAL ISSUES

Buildings consume **75% of the electricity & 40% of the total energy** used in the United States

From: heating, ventilation, AC; lighting; appliances, plug loads, etc.

Shelter/Energy Pathway Cards

GLOBAL ISSUES

Rapid urbanization and construction rely on **carbon-heavy cement and steel**, causing around **37%** of global CO₂ emissions when combined with energy use.

Shelter/Energy Pathway Cards

FOOD/WATER

encourages the environmentally friendly production and consumption of food and water by consuming less water in and outside of our homes while also wasting less food. The goals for this pathway are improving water use efficiency, ending food and water scarcity and reducing pollution.

Food/Water Pathway Cards

LOCAL ISSUES

Philadelphia residents generate over **206 million pounds** of food waste yearly, yet over 20% of its residents and 30% of children **lack access** to nutritious foods.

Food/Water Pathway Cards

NATIONAL ISSUES

Organic food options can be up to **80% more expensive** than its non-sustainable counterpart, making greener/healthier options **unaffordable** for many families.

Food/Water Pathway Cards

GLOBAL ISSUES

Globally about **1/5th** of all food created for human composition is wasted with humans generating **1.05 billion tons** of food waste annually.

Food/Water Pathway Cards

CONSUMER PURCHASES

tracks the lifecycle of products people buy: how they're made, transported, used, and thrown away, and how each stage contributes to carbon emissions, waste, and resource depletion.

Consumer Purchases Pathway Cards

LOCAL ISSUES

In 2023, Philadelphia residents used about **1 billion single-use plastic bags** annually, for retail and grocery purchases.

Consumer Purchases Pathway Cards

NATIONAL ISSUES

Americans generate about **50 pounds of e-waste per person**, driven by frequent upgrades of electronics like phones, laptops, and appliances

Consumer Purchases Pathway Cards

GLOBAL ISSUES

Fast Fashion Pollution is Responsible for **20% global wastewater and 10% CO₂** which is more impact than air + sea shipping combined
